## Exporting From Acteon 1/2

#### 1. New Folder

On your desktop, right-click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

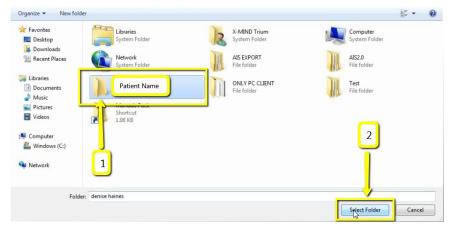

#### 2. Export

Open the patient history and right click on the tile of the newest CBCT. Select "Export DICOMDIR".

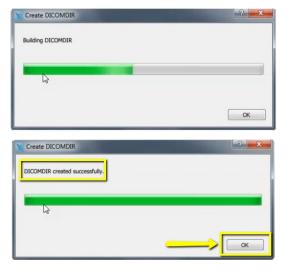

#### 3. Select Folder

Click the folder you made on the Desktop and click "Select Folder".

#### 4. Complete Export

The DICOM will begin exporting. Click "OK" once complete.

### Exporting From Acteon 2/2

#### 5. Verify

After the DICOM exports and saves, go to the patients folder and verify the .dcm files were exported correctly; there should be several hundred files.

## **Exporting From Acteon Viewer**

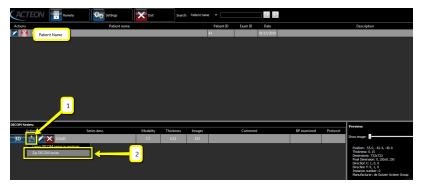

#### 1. Start

Open the CD/USB and click "Start".

#### 2. Load in AIS3DApp

Once the CBCT loads in the AIS3DApp, click the folder icon under "DICOM Series". Click "Zip DICOM series".

#### 3. Save

A pop-up will appear for the save location. Select "Desktop". Type the patients name into the "File Name". Click "Save".

#### 4. Finishing export

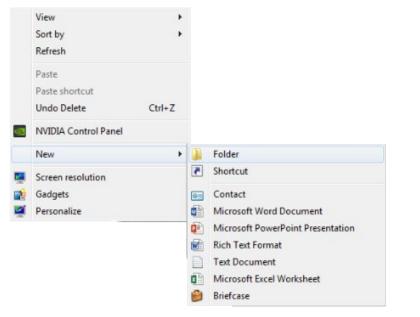

In the upper-right-hand corner, you will see a loading box. There will not be an alert when it has finished exporting.

## Exporting From AxiUm MiPacs 1/3

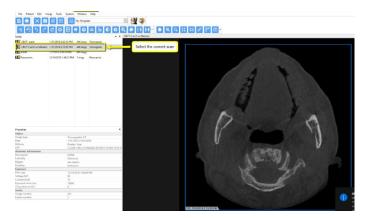

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

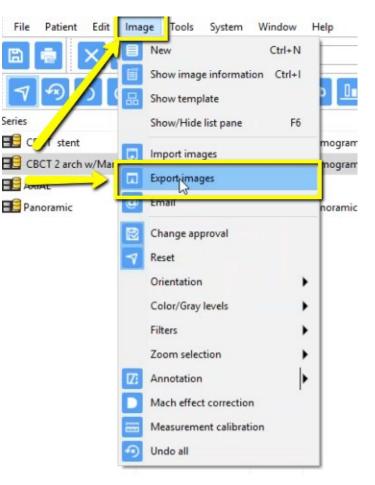

#### 2. Select Scan

Select your patients CBCT scan in the MiPacs software.

#### 3. Export

Go to "Image" and click "Export Images".

### Exporting From AxiUm MiPacs 2/3

2.

Cancel

OK

#### 4. Select folder

A pop-up box will appear. Under "Destination" select the folder you created on your desktop and click "Ok".

## Exporting From Carestream 1/2

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

#### 2. Open image

Open your image and go to the "Export the volume" icon located on the left side of your screen.

#### 3. Browse

In the pop up window, you'll notice 3 different sections. On the first section, click "Browse" to select the export location.

8100 dicom export	_ 🗆 ×
1. Sek	ect file and directory
Select output directory C:\Users\D1518	39\Desktop\Test case Browse
2.	Select resolution
Select axial matrix size (pixels)	Select slice thickness

## Exporting From ICAT 1/3

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

#### 2. Patient database

In the patient database, click on the patient name. Under the "File Type", click on "CT".

#### 3. Create New Workup

A pop-up will appear. Click on the file, and click "Create New Workup".

Workup Name	Creation Date
Implant#8	Thursday, December 08, .
2	

#### 4. Select

The patient scans will load. In the upper left corner, click on "Tools", "Export DICOM", then "Original Study".

Create Report Date Export DICOM Create Export CD Import Study Filter Settings Hide Study List

## Exporting From ICAT 2/3

Make sure "Multi-File DICOM" and "Uncompressed" are selected. Then click on "Browse" to choose the export location.

DICOM Export Properties	
Output Selection Single File DICOM Compressed	
Destination: C:\DICOM Exports	Browse
	OK Cancel

#### 6. Select Folder

Select the folder you just created on the desktop and click "OK".

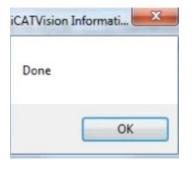

#### 7. Export

You will return to this screen. Click "OK". Your files will begin exporting.

Output Sele	ction			
	Single File DICOM	🕅 🔽 Multi-F	ile DICOM	
	Compressed	Uncom	pressed	
	Us	e Lossy Compre	ssion	
Destination:				Browse
C:\Users\d07	042\Desktop\Joh	n Toups Patient	:	

#### 8. Finish Export

Click on "OK" when the "Done" pop up appears.

## Exporting From ICAT 3/3

#### 9. Verify .dcm Files

After the DICOM exports and saves, go to the patient's folder and verify the .dcm files were exported correctly; there should be several hundred files.

## Exporting From Iluma 1/3

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

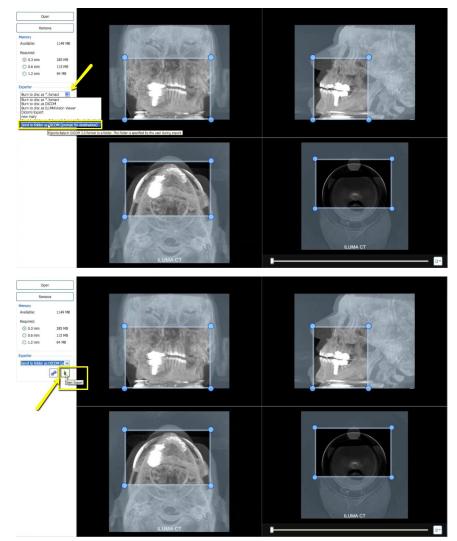

#### 2. Patient database

Find the patient in the database and open their CBCT scan.

#### 3. Export

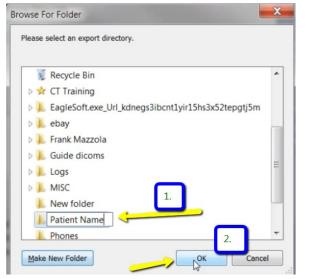

Once the scan opens, under "Exporter", select the option "Send to folder as DICOM (prompt for destination)". Click the green arrow, titled "Start Export".

## Exporting From Iluma 2/3

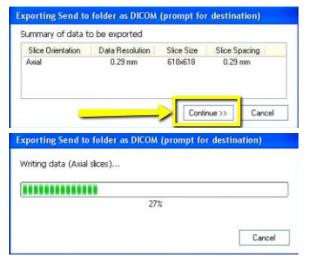

#### 4. Select folder

A pop-up will appear for the save location. Select the folder that you just created on the desktop and click "OK".

#### 5. Continue

A summary will appear for exporting data. Click "Continue".

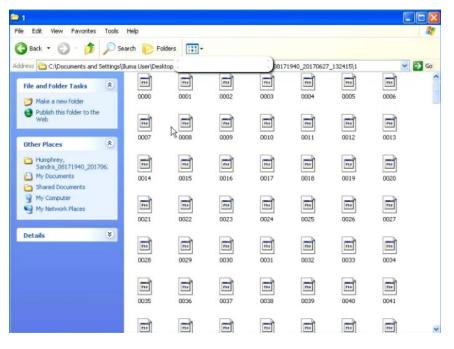

#### 6. Finish Export

Once complete, click "OK".

#### 7. Verify .dcm Files

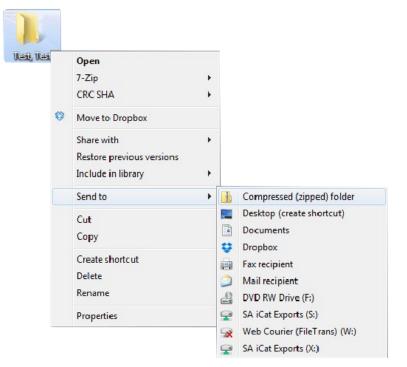

After the DICOM exports and saves, go to the patients folder and verify the individual files were exported correctly; there should be several hundred files.

### Exporting From Iluma 3/3

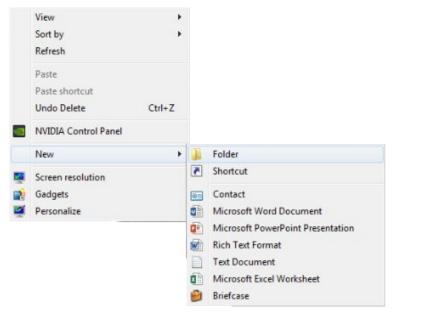

#### 8. Zip Folder

Go back to the desktop, right-click on the patient's folder, go to "Send to", and select "Compressed (zipped) folder". A duplicate folder will be made with either a zipper on it, or a blue "Z".

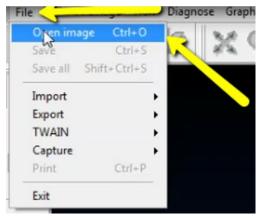

## Exporting From Instrumetarium 1/2

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

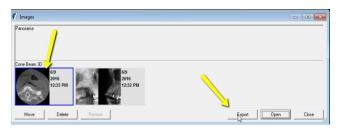

#### 2. Open Image

In your Instrumetarium, click on "File", then "Open Image".

#### 3. Export

Select the CBCT scan by clicking on it once. Then click "Export".

#### 4. Complete Export

A pop up will appear. Ensure DICOM Modality is set to "CT". Select the folder you just created on the desktop and click "Export".

## Exporting From LED Imaging 1/3

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

#### 2. Export Images

Select the patient in your database and go to "Patient", "Patient Utilities", and click "Export Images".

### Exporting From LED Imaging 2/3

#### 3. Select Folder

A pop-up will appear. Click the "..." button and select the folder you made on the Desktop.

Export files to the following path:	
C:\Users\pan\Desktop\Test	
Convert images to JPEG whenever possible Use special exporting for directly captured	e images (i.e. those captured via a direct capture extension)

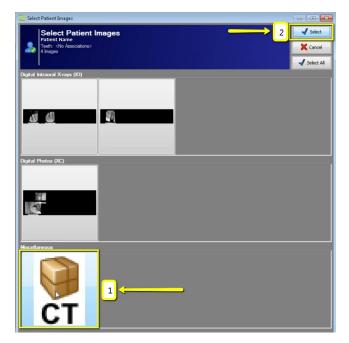

#### 4. Check Boxes

Ensure "Convert to JPEG whenever possible" is UNchecked, and "Use Special exporting for directly captured images" IS checked. Click "OK".

xport Target Path	
Export files to the following path:	
C:\Users\pan\Desktop\Test	
Convert images to JPEG whenever Use special exporting for directly of	er possible captured images (i.e. those captured via a direct capture extension)

#### 5. Select CT scan

Another pop-up will appear. Click the CT scan and click "Select".

#### 6. Export .dcm files

A final pop-up will appear. Click "No" to export the multi-file DICOM.

### Exporting From LED Imaging 3/3

#### 7. Verify .dcm Files

Go to the patient's folder on the desktop and double-click to open it. Verify the .dcm files were exported correctly; there should be several hundred files.

## Exporting From Morita 1/3

#### 1. Locate Patient

Locate patient in your database and open their case.

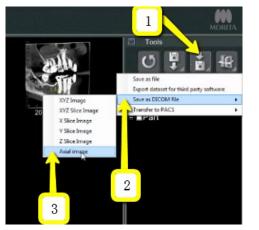

#### 2. Select

Click on the CBCT scan to select it, but do not open it. It should be outlined in green.

#### 3. Save as .dcm

On the right side of the screen, click on "Save DICOM" button. Choose "Save as DICOM File", then click "Axial Image".

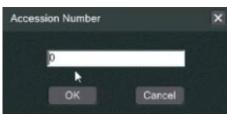

#### 4. Check Boxes

A box will pop-up titled "Slice Setting". Change the "Interval" and "Thickness" to the lowest setting possible (about 0.160 for each setting). Then click "OK".

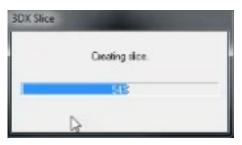

#### 5. Check Accession Number

Accession Number should be 0. Click "OK".

#### 6. Saving

When complete, you will be prompted with a new alert window that says "Finished saving the Axial Image DICOM File". Click "OK".

## Exporting From Morita 2/3

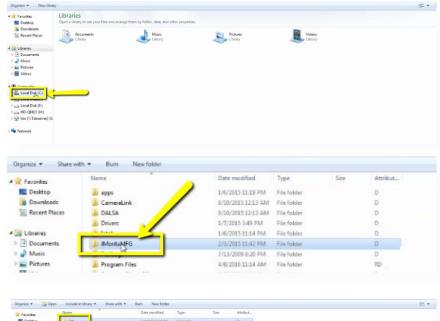

#### 7. Saving finished

When complete, you will be prompted with a new alert window that says "Finished saving the Axial Image DICOM File". Click "OK".

#### 8. Locate .dcm files

Locate these DICOM files by clicking on "Local Disk (C:)", then "JMori-taMFG", "3Dx", "Simulation".

#### 11. Zip Folder

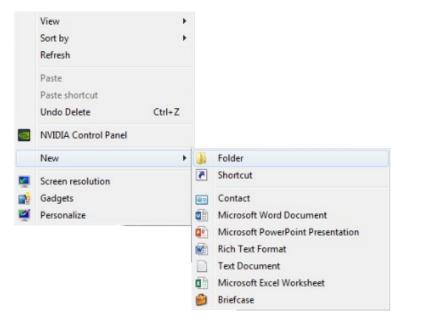

Right click on the patients folder, go to "Send to", and select "Compressed (zipped) folder". A duplicate folder will be made with either a zipper on it, or a blue "Z".

## Exporting From NewTom 1/2

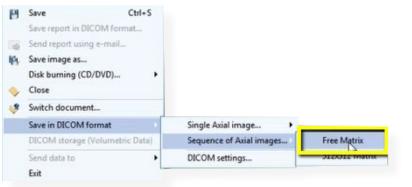

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

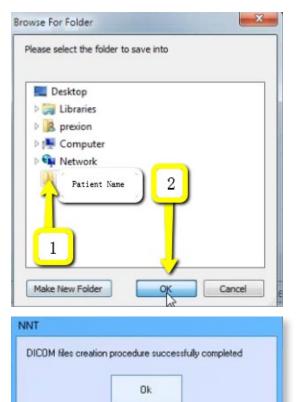

#### 2. Free Matrix

Open the patients scan. Select "File", "Save in DICOM format", "Sequence of Axial Images", and select "Free Matrix".

#### 3. Export

A pop-up will appear for the export location. Select the folder you just created on your desktop. Click "OK" to export images. Another pop-up will appear once DICOM has exported. Click "Ok".

### Exporting From NewTom 2/2

#### 4. Verify .dcm Files

Go to the patients folder on the desktop and double click to open it. Verify the .dcm files were exported correctly; there should be several hundred files.

### Exporting From NewTom Viewer 3/3

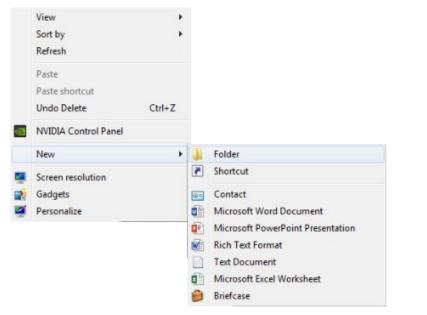

#### 7. Zip Folder

## Exporting From Owandy 1/2

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

### 2. Open Owandy

Open the Owandy software. Type in the patients name and click "Find".

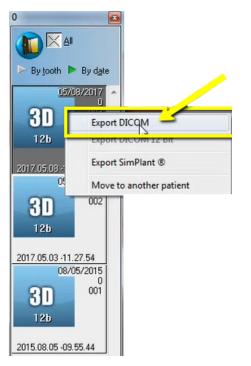

#### 3. Click Mouth

Once the patients information appears, click the "Mouth" icon located on the left hand side of your screen.

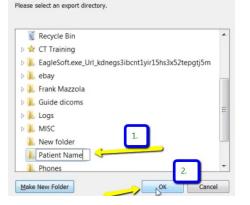

### 4. Export DICOM

Find the most recent CBCT scan. Right click on the 3D image, and choose "Export DICOM".

## Exporting From Owandy 2/2

A pop-up will appear with the save location. Select the folder you just created on the desktop and click "OK".

#### 6. Verify .dcm Files

After the DICOM exports and saves, go to the patient's folder and verify the .dcm files were exported correctly; there should be several hundred files.

### Exporting From Planmeca 4/4

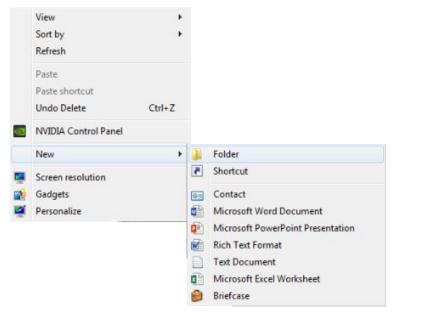

#### 8. Zip Folder

## Exporting From PreXion 1/2

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

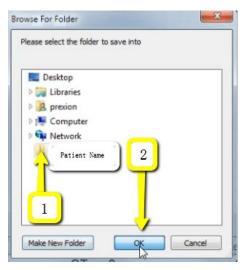

#### 2. Download

In your PreXion, right click on the patient's name and go to "Study Management" and click "Download Study".

Patient ID	Patient	Modality	Study Date, T	īme	Age	Gender	Descrip	otion	AE Title	DOB	Study ID	Accession

											Push Study	
											Retrieve Stu	

### 3. Export

Select the folder you just created on the desktop. Click "OK" to export the images.

### Exporting From PreXion 2/2

#### 4. Verify .dcm Files

After the DICOM exports and saves, go to the patients folder and verify the .dcm files were exported correctly; there should be several hundred files.

## Exporting From Rayscan 1/2

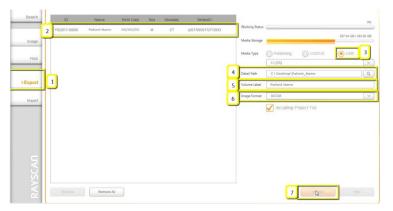

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

#### 2. Open Rayscan

Open the Rayscan software and in the "Search" tab, select the correct dates, and type in the patient's name. Click the orange magnifying glass button to search.

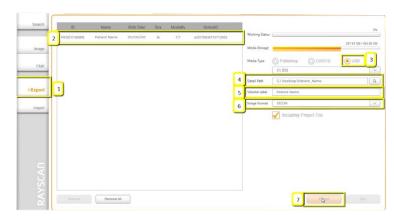

#### 3. Export

Select the correct file and click "Export". You will get a pop-up verifying that the patient information has been added to the export tab. Click "OK"

Search	Patient Select								List	Thumbna
				То 10/05/2017		N N	ame Patient Nar		Ciear	Q,

Export										
Import										
-										
AN										
SCAN									_	
RAYSCAN									2	)

#### 4. Complete Export

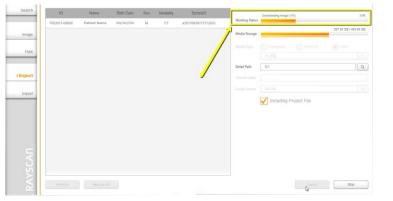

Click on the "Export" tab and select the correct patient information. To the right-hand side, you will have different exporting options. For media type, select "USB". For "Detail Path" click on magnifying glass button. A pop-up will appear for the save location. Select the folder we just made on the desktop and click "OK". Type in the patient's name next to "Volume Label". For the "Image Format" choose DICOM. Click "Export".

### Exporting From Rayscan 2/2

#### 5. Complete

The export will begin working. Once the export reaches 100%, you will get a pop-up stating it is complete. Click "OK".

#### 6. Verify .dcm Files

After the DICOM exports and saves, go to the patient's folder and verify the .dcm files were exported correctly; there should be several hundred files.

## Exporting From Sidexis 4 1/3

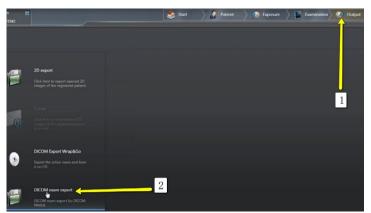

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

#### 2. DICOM Export

Go to patient scan and click on "Output", then "DICOM Exam Export".

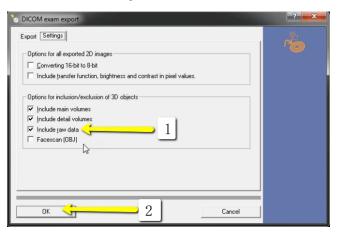

#### 3. Settings

An additional window should pop up with the patient scan. Click on "Settings".

#### 4. Check Boxes

Please ensure that "Include Raw Data" is selected. No other options should have to change. Click "OK".

### Exporting From Sidexis 4 2/3

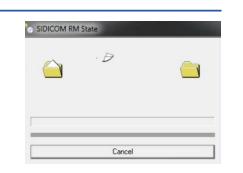

#### 5. Save

Another window should pop up for a save location. Select the folder you just created on the desktop and click "Open", then "Save".

Save in: 📃 Desktop	
C TOT KR	*
Anderson File folder	
patient name	
<b>N</b>	<u>ا</u> ر -
File name: DICOMDIR	Open
Save as type: DICOM Directory (DICOMD	(R) Cancel
2. 1 (	
	· · · · · · · · · · · · · · · · · · ·
_	▼ ⇔ ⊡ ☆  -
Save in: Patient Name	
Save in: Patient Name Name No items match	

### 6. Export

Your files will begin exporting.

#### 7. Verify .dcm Files

After the DICOM exports and saves, go to the folder and look for the sub folder named "CT3" (you may have to open a few folders before you see it). Verify the files were exported correctly; there should be several hundred files.

## Exporting From Sidexis XG 1/4

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

#### 2. DICOM Export

Go to patient scan and click on "Output", then "DICOM Exam Export".

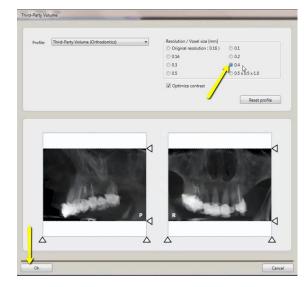

#### 3. Export

Select "Image", "Export", and click "Export Third Party DICOM".

### 4. Check boxes

Select "0.4 Voxels", and click "OK".

### Exporting From Sidexis XG 2/4

#### 5. Save

Click "dcm" and under the Export Directory section, click the "..." box to select the folder on your Desktop labeled with the patients name. Click "Open" then "Save!".

# Exporting From VaTech (Ez3D-i) 1/3

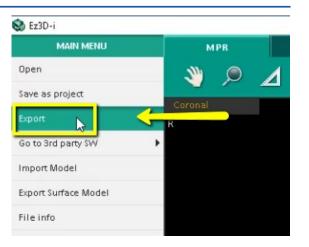

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

#### 2. Export

In your VaTech, open the patient scan. Click on "Main Menu", then "Export".

#### 3. Save

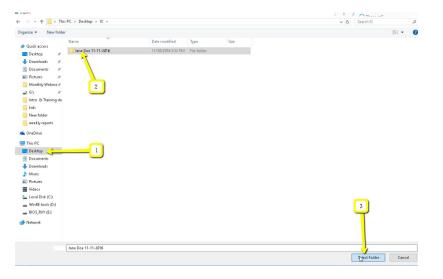

A pop up box will appear. For "Save Type", select "Local Disk". For Compression, select "Looseless". Then check the items that you would like to export. Implant Concierge requires only the "DCM Files". However, if you are a scanning site and would like to send the viewer to the Doctor, select "Viewer". If you are wanting to export your treatment plan, select "Project File". Then, click "Save"

# Exporting From VaTech (EZDent-i) 1/3

#### 1. New Folder

On your desktop, right click on an empty space. Go to "New" and click "Folder". A folder will appear with highlighted blue text. Type in the patient name and push "Enter" on your keyboard.

#### 2. Download

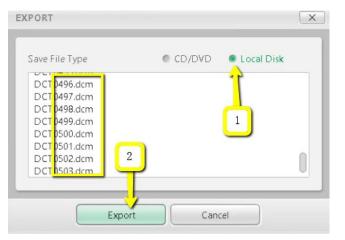

In your VaTech, select your patient and right click on the CBCT scan. Click "Export". Your files will begin downloading.

2 🛃 🔯		_						Patient Name

## Exporting From VaTech (EZDent-i) 2/3

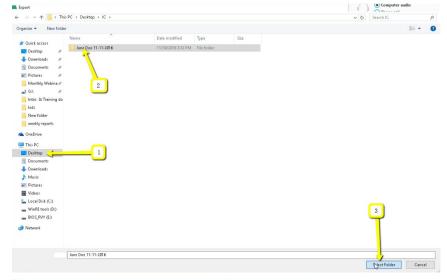

#### 3. Export

A pop-up will appear. You should see several hundred .dcm files. Click on "Local Disk", then "Export".

#### 4. Export .dcm files

A second pop-up will appear for the save location. Select the folder you just created on the desktop, and click "Select Folder". The DICOM files will begin to export. Once the files are exported, you will get a confirmation pop-up. Click "OK".

Export

Current	25.2
Total	0.0
Cance	el
Information	?
The file is exported success	sfully.

## Exporting From VaTech (EZDent-i) 3/3

#### 5. verify .dcm files

After the DICOM exports, go to the patients folder and verify the .dcm files were exported correctly; there should be several hundred files.
